

Burning down

Nomy

Everything needs to be right, look right, act right
Looking like you're all ok
And everyday you need to be good, look good, act good
Listen to the shit they say

But you don't wanna be the one that breaks down
But the flame is out and you're about to drown
And now I see the situation you're in
You gave them all you had but you're burning down

You don't wanna feel this empty
You don't wanna be there anymore
And everything you gave is what you're paying for
But you're burning down
You don't wanna feel this guilty
You don't even care what's going on
Everything you gave is what you're dying for
But you're burning down

Everyday when you wake up, dress up, make up
Looking like they want you to
And everything you gotta find out, work out, send out
All the shit they want you to do

But you gotta work for the higher
Bring the commands and all you desire
But you gotta stay in the fire
Give all you have and be a supplier
And now I see the situation you're in
You gave them all you had but you're burning down

You don't wanna feel this empty
You don't wanna be there anymore
And everything you gave is what you're paying for
But you're burning down
You don't wanna feel this guilty
You don't even care what's going on
Everything you gave is what you're dying for
But you're burning down

Yeah, they burn you down, they burn you down
Every god damn day for the rest of your life they burn you down
They burn you down, they burn you down
Every god damn day for the rest of your life they burn you down

But you gotta work for the higher
Bring the commands and all you desire
But you gotta stay in the fire
Give all you have and be a supplier
And now I see the situation you're in
You gave them all you had but you're burning down

You don't wanna feel this empty
You don't wanna be there anymore
And everything you gave is what you're paying for
But you're burning down
You don't wanna feel this guilty

You don't even care what's going on
Everything you gave is what you're dying for
But you're burning down

Everything needs to be right, look right, act right
Looking like you're all ok
And everyday you need to be good, look good, act good
Listen to the shit they say

Everyday when you wake up, dress up, make up
Looking like they want you to
And everything you gotta find out, work out, send out
All the shit they want you to
