

## Cross fire

Nomy

I was chasing down night trains  
Even if I'm never gonna see you again  
But the night is young  
And the fire is gone

We were living like gods  
But everything started spinning out of control  
I said please hold on  
You were long way gone

But now you're walking in the rain, my friend  
Yeah, you've been chewing blood again  
It's hard to say goodbye, my love  
I'm stuck in the crossfire

Put the train on fire, fire, fire  
Fire right now  
Put the train on fire, fire, fire  
Let it all burn down

I've been standing by the ghosts and the broken ones  
Only to be close to you  
They said please move on  
She won't come back, son

We were living like gods  
But everything started spinning out of control  
I said please don't go  
You were long way gone

But now you're walking in the rain, my friend  
Yeah, you've been chewing blood again  
It's hard to say goodbye, my love  
I'm stuck in the crossfire

Put the train on fire, fire, fire  
Fire right now  
Put the train on fire, fire, fire  
Burn it down

But now you're walking in the rain, my friend  
Yeah, you've been chewing blood again  
It's hard to say goodbye, my love  
I'm stuck in the crossfire, hey  
I'm stuck in the crossfire  
I'm stuck in the crossfire  
I'm stuck in the crossfire
