

Killing dreams

Nomy

I've been running down that road
I've been so dedicated
I've been wandering through the night
To find the right to be persuaded

I've been hurting all the way
Blood stained misery
I've been looking for someone
But none, but you, can heal my infection
But still we just love that depression

We've been here forever
Killing dreams together
Always had a reason to
Keep on hurting us for pleasure
We've been suffocating
We've been humiliating
Always found a reason to
Keep what we have interesting

No I will never believe
No I will never believe
No I will never believe in love
No I will never believe
No I will never believe
No I will never believe in love

I've been hunting down the road
I've been sensational
I've been looking for the one
To come, succumb, become perfection

I've been looking for the way
Shotgun visible
I've been looking for someone
But none, but you, can heal my infection
But still we just love that depression

We've been here forever
Killing dreams together
Always had a reason to
Keep on hurting us for pleasure
We've been suffocating
We've been humiliating
Always found a reason to
Keep what we have interesting

No I will never believe
No I will never believe
No I will never believe in love
No I will never believe
No I will never believe
No I will never believe in love

I've been looking for someone
Someone to hold me back
And until my days are done

I'll stay with you

I've been looking for the one
Someone to call my home
Someone to hold me down
And so you came
And you broke
Me

We've been here forever
Killing dreams together
Always had a reason to
Keep on hurting us for pleasure
We've been suffocating
We've been humiliating
Always found a reason to
Keep what we have interesting

We've been here forever
Killing dreams together
Always had a reason to
Keep on hurting us for pleasure
We've been suffocating
We've been humiliating
Always found a reason to
Keep this fucking complicated
