

Salvation

Nomy

Let it out

I keep calling you
Like I always do
'Cause When you're lost within
Down and out
I'll drag you in

Buried deep inside
Always been denied
'Cause on your final note
Lost in fear
I'm coming out

'Cause you've been fighting
And screaming
You're down on your knees
I got you like a deadly disease

'Cause you've been fighting
And screaming
You're down on your knees
I got you like a deadly disease

Now you can run if you want to
But it can never be undone
And you have never been this far from salvation

Now you can run if you want to
But you will always be alone
And now you're crying out for salvation

Let it out

I keep telling you
What I want you to
'Cause in your final round
Down and out
I'll drag you down

Weakness taking you
All the things you have done
And now you're lost within
Let it out
Your final sin

Now you can run if you want to
But it can never be undone
And you have never been this far from salvation

Now you can run if you want to
But you will always be alone
And now you're crying out for salvation

Now you can run if you want to
But it can never be undone
And you have never been this far from salvation

Now you can run if you want to
But you will always be alone
And now you're crying out for salvation
