

# Society falls

Nomy

I feel it  
Go faster  
Everybody got an open heart  
To believe in the pain of a dying start

Let's leave it  
Behind us  
Everybody got an open heart  
To believe in the pain of a dying start

Are we alone?  
We're getting older  
This isn't living but nobody is keeping score

Are we alone?  
I didn't tell her  
This isn't living but nobody gave you more

I feel it  
Disaster  
Everybody got an open heart  
To believe in the pain of a dying heart

I feel it  
Like cancer  
Everybody got an open heart  
To believe in the pain of a dying start

Are we alone?  
We're getting older  
This isn't living but nobody is keeping score

Are we alone?  
I didn't tell her  
This isn't living but nobody gave you more

And piece by piece, you will lose it all  
Let them all burn and society fall

Everybody got an open heart  
To believe in the pain of a dying start  
Everybody's gonna fuck it up and die  
But a life ain't a life if you just won't try

Everybody got an open heart  
To believe in the pain of a dying start  
Everybody's gonna fuck it up and die  
But a life ain't a life if you just won't try

Everybody got an open heart  
To believe in the pain of a dying start  
Everybody's gonna fuck it up and die  
But a life ain't a life if you just won't try

Everybody got an open heart  
To believe in the pain of a dying start  
Everybody's gonna fuck it up and die

But a life ain't a life if you just won't try
