

Wake me up

Nomy

Wake me up before you go
I really want you to know
That I'm in love with you

I'm not use to see you like this
so tell me what did I miss
What kind of a girl are you

this makes me feel so unreal
I think I'm not alone

Girl you really score
but I dont like you anymore

You are not the one I want and
you can never bring me light
you do this every night

So be it I dont even care
tell me what have you done
You've been with everyone

My misstake lets give you a brake
It's your puberty show
Oh baby you're so low

Girl you really score
but no one likes you anymore

You are not the one I want and
you can never bring me light
you do this every night

You dont have a self esteem
You are living in a dream
It hurts you every night

Here I am there you are
in someones car

Walk on by still I know
you wont get far
