

Die Together

Nordic Union

I gonna let go
But my head is feeling numb
My heart is so cold
Everything I had is gone
I cannot breath, I cannot speak
What was strong is now so weak
Won't be the same... again

But with open arms you sailed away
So strong so brave on your final day
But in our dreams we thought that we'd grow old
And we'd die together
We'd die together

You burned like the sun
And the stars were in your eyes
We were so young
With no dark and cloudy skies
Without a sound, without a fight
The day turned into night
And now you're gone... away

But with open arms you sailed away
So strong so brave on your final day
With open arms you turned to me
You embraced the sleep that would set you free
But in our dreams we thought that we'd grow old
And we'd die together

Right now was all that mattered
Right now was all we had
There were no tomorrow or no yesterday
Yeah, right now was all that mattered
But now is gone away

But with open arms you sailed away
So strong so brave on your final day
With open arms you turned to me
You embraced the sleep that would set you free
But in our dreams we thought that we'd grow old
Yeah, in our dreams we thought that we'd grow old
And we'd die together
We'd die together
