

Scream

Nordic Union

Every day's the same
Every day this pain
That we always try to fight
And the winner takes it all and take your life

Now the winter's here
This contagious fear
So hard to let it go
But the song remains the same along this road

So come on and scream
For the broken hearted, scream
Never let them steal your dreams
Just say the words
It's gonna hurt
Come on and scream
For the twisted hearted, scream
Never let them kill your dreams
Just say the words
Make it really hurt
Make it really hurt

We all lose control
Let our hearts grow cold
Better on the other side
Just reflections of a life we used to live

So come on and scream
For the broken hearted, scream
Never let them steal your dreams
Just say the words
It's gonna hurt
Come on and scream
For the twisted hearted, scream
Never let them kill your dreams
Just say the words
It's gonna hurt, oh it hurts

Gotta go
Gotta fight
Gotta know what is right
It's there for you

Take a chance
Take a leap of faith
To find a better place
