

# The Final War

Nordic Union

On your knees bow your head cause the count is on  
And hell ain't half full yet

Dying breed living dead  
A titanic contest  
Between good and bad

The ultimate showdown  
The horsemen's riding tonight

Here we are standing in the dark  
Here we are clutching the final straw  
The king of kings duels the fallen star  
The tribulation this is the final war  
Oh oh  
This is the final war

Turn away shut your eyes  
As descending angels lightens up the sky

Prophecies will unveil  
Now it's kingdom come  
Or hell to those who failed

A trinity of evil  
The suffering has only begun

Here we are standing in the dark  
Here we are clutching the final straw  
The king of kings duels the fallen star  
The tribulation this is the final war  
Oh oh  
This is the final war

In the holy land  
The seals are broken  
The triumph of the lamb  
The second coming  
Divides the souls of man

Here we are standing in the dark  
Here we are clutching the final straw  
The king of kings duels the fallen star  
The tribulation this is the final war  
Oh oh  
This is the final war

Thunder in the underground  
Fire from the heavens above

Here we are standing in the dark  
Here we are clutching the final straw  
The king of kings duels the fallen star  
The tribulation this is the final war  
Here we are standing in the dark  
Hell-bound or set for forevermore  
The king of king duels the fallen star

The tribulation this is the final war  
Oh oh the final war
