

Fever

Normandie

I think I'm catching a fever
Turn the lights out, turn the lights out, I'm going insane
I think I'm caught in a seizure
All my memories flash before my eyes

Show me the ending
Where I don't give all my heart out
I'm broken, pretending
That I'm alright

If I lost myself in a cheap motel somewhere
Would you be there?
I'm a mess sometimes, but at least I try, I swear
That I will never do it again
(I will never do it)

I think I'm burning my senses
Wait it out now, wait it out now, you're gonna come down
Abandoning my defenses
A synthetic cry for suicide

Show me the ending
Where I don't give all my heart out
I'm broken, pretending
That I'm alright

If I lost myself in a cheap motel somewhere
Would you be there?
I'm a mess sometimes, but at least I try, I swear
That I will never do it again
(I will never do it)

Seal the door and hide me from myself
'Cause I can't take it
Be the cure and save me from this hell
We all get lost somehow

Will you be that high that takes me down?
Will you be the drug I overdose?
Will you be that high that takes me down?
Will you be the drug I overdose?

If I lost myself in a cheap motel somewhere
Would you be there?
I'm a mess sometimes, but at least I try, I swear
That I will never do it again
