

# Violence

Normandie

Violence, Violence, Violence  
Fuck common sense  
Violence, Violence, Violence  
Go!

Yeah!

We're all animals  
We keep our instincts at heart  
And this time I really can't control them at all  
You say it's all about to give and take  
But your selfishness has put my life at stake

Burn baby, burn  
We put this whole town in flames  
And all of the buildings that you've marked with your name  
They say it's all about what you give and take  
Eye for an eye  
You better stay awake

Violence  
It's the only way  
It doesn't matter what you say  
Violence  
I can honestly say  
You got one foot in the grave

Break out from the crowd  
You versus me is how it's gonna go down this time  
Get up and take what you deserve

But I have tried so hard to keep my mind restrained  
But I gave you a warning and now it's too late  
And you know who's to blame  
How many times have I told not to spend your time on wasting mine?  
I got enough of you  
So take two steps back and pray to God he let's you through

Now you're fucked!  
This time you can't get away  
The lesson is learned but it is learned too late  
My life is in ruins and someone's gotta pay  
You better pray!

Violence  
It's the only way  
It doesn't matter what you say  
Violence  
I can honestly say  
You've got one foot in the grave

Think about this before you go to sleep  
You're not awake when living someone else's dream  
You stole my crown  
You stole my soul  
I'll make sure that your children  
Never will be born

Do you regret what you've done?  
'Cause it was never my intention to go this far  
Call for help  
Wave your flag  
I'm afraid that it's too late for you to repent

But I have tried so hard to keep my mind restrained  
But I gave you a warning and now it's too late  
And you know who's to blame  
How many times have I told not to spend your time on wasting mine?  
I got enough of you  
So take two steps back and pray to God he let's you through  
(Let's you through)

Violence!
