

# Different

Northern Lite

And I feel  
The night is falling down  
For my wounds to heal  
The night is falling down  
And it's different...

Now I see  
Just why I'm ill at ease  
It's the similarities  
And all of my tragedies  
Now it's different...

And I know  
When you're that close to me  
That time is gonna show  
It's our destiny  
Cause you are different

Now it's different...
