

This Night

Nosound

You took me by surprise
The light through the open blinds
Waking up in front of your eyes
I can see the other side

I stand in front of your face
the radio plays our favourite song
With your hands you're starting to trace
a way where I have never gone

Please wait, I'll arrive
Don't leave, I'll come
Don't go by my side
Don't trust my mind
Light up this night

Please wait!
