

# Weaponize Your Rage

Not Enough Space

And poof, fire

Burn, burn, burn strike the match and set it all ablaze  
Stand back  
Watch me douse the world in gasoline  
Burn, burn, burn  
Egnite the monster that's inside of me  
You're either with me, or you're just a fucking enemy

Don't try to run from your flames

Just crash and burn  
Watch the world fall away  
Don't play the victim  
It's time to go  
Weaponize your rage

Burn, burn, burn  
Spread the fire, fan the flames  
Stand back and watch it burn  
Engulf the world in pain  
Burn, burn, burn  
Promise there will be a hell to pay  
You're either with me, or you're just a fucking causality

Just crash and burn  
Watch the world fall away  
Don't play the victim  
It's time to go  
Weaponize your rage

(Weaponize your rage)  
(Weaponize your rage)

When you light a match, the damage could cost you everything  
When you light a match, you'll find what no one wants you to see

I wanna watch you burn, motherfucker  
Burn, burn, burn, burn, burn, burn, burn  
Eeyah!  
Now you're just another causality

Don't try to run from your flames

Just crash and burn  
Watch the world fall away  
Don't play the victim  
It's time to go  
Weaponize your rage

Burn, burn, burn
