

Dream With Me

Nothing More

(Trust yourself to the darkness)

Higher
Higher
Out of the fire
We can leave the ground

Lighter
Lighter
Free of desire
Between what you really want and what you really need
Out of the dark
Let's go!

Just dream with me
Dream with me
Close your eyes and believe with me
Believe with me
I can't stand that you're fighting this all on your own
The cancer has come and it followed you home
Don't you die on me
Don't you die on me

Inside us
Inside us
A voice that reminds us
We can leave the ground

All the burdens piled upon the
Scales of life and the gods above can't
Hold us to the ground
Like animals cut down at the knees
And you see that the world is not what it seems...

Falling... in too deep...
So many of us stuck in denial

Just dream with me
Dream with me
Close your eyes and believe with me
Believe with me
I can't stand that you're fighting this all on your own
The cancer has come and it followed you home
Don't you die on me
Don't you die on me

Let go
Let go

It holds us to the ground like animals (go)
It holds us to the ground

Out of the dark, out of the dark, out of the dark
Out of the dark, out of the dark, out of the dark
Out of the dark

Just dream with me

Follow my voice as we crawl through the dark
Believe with me
Trust what you already know in your heart
I can't stand that you're fighting this all on your own
The cancer has come but you're never alone
Don't you die on me
Don't you die, don't you fade
Don't you cry, just stay and

Be free with me
Be free with me
Close your eyes and believe with me
Believe with me

Dream with me
Dream with me
Close your eyes and believe with me
With me, with me, with me, with me, with me
With me
