

Face It

Nothing More

Moment's now
Shed this doubt
Stand your ground
Face it
Feel the sound
Stronger now
Only one way out
Face it

No more time
No more light
The sun has turned
And the moon has died
No more time
No second life
A man is born
And the boy has died

Face it
It's time, face it

I've bit the nail
I've swallowed truth
I've fought through hell
So who the fuck are you?
You'll never get to me
But I'll get to you
I am the ugly truth

Come and take it
Come and take it
Overwhelming
Overcoming
I'm on my own

Silencing the angels
In the better part of you
Calling on the shadow
From the bitter side of truth

Trusting the nature
In the darkest part of you
The chaos and disorder
From the bitter side of truth...

Face it
It's time, face it

I am your gut
I am the truth
I am the power in you
I am the pulse
That pushes through
The cold blood inside of you

Come and take it
Come and take it

Senses Firing
Realizing
I'm on my own

Silencing the angels
In the better part of you
Calling on the shadow
From the bitter side of truth

Trusting the nature
In the darkest part of you
The chaos and disorder
From the bitter side of truth...

Set myself on fire
Gotta face this on my own
Flames are raging higher
Gotta face this on my own

Moment's now
Shed this doubt
Stand your ground
Face it

Feel the sound
Stronger now
Only one way out
Face it

No more time
No more light
The sun has turned
And the moon has died

No more time
No second life
A man is born
And the boy has died

Face it
Face it

It's time
It's time

No more time
No more light
The sun has turned
And the moon has died

Silencing the angels
In the better part of you
Calling on the shadow
From the bitter side of truth...

...in you...
...in you...
...in you...
...in you...
It's you...in you...
