

# Tunnels

## Nothing More

In the tunnels of life  
We hold our breath we close our eyes  
Stiff as a board until the other side  
We fill our lungs and we pray for light  
We fill our lungs and we pray for light

I will make it through this  
Digging deep, sinking in  
I'm done with everything holding, holding me down  
I will make it through this  
There's a time to die and a way to live  
I'm not going out like this

Always smile and pretend  
We wanna give up, we wanna give in  
When hopelessness is content, yeah  
We feel our worlds caving in  
We feel our worlds caving in

I will make it through this  
Digging deep, sinking in  
I'm done with everything holding, holding me down  
I will make it through this  
There's a time to die and a way to live  
I'm not going out like this, like this, no

We are the night, we are the dream  
We are everything we need  
Just breathe, just breathe  
We are the strength down to the bone  
We got the grip that shapes the mold  
We make our own, we make our own

It's all risk to never regret  
Taking every chance we get to make our own, to make our own

I will make it through this  
Digging deep, sinking in  
I'm done with everything holding, holding me down  
I will make it through this  
There's a time to die and a way to live  
I'm not going out like this, like this, no

I gasp for air, it's getting thin  
I'm blacking out, and shedding skin  
As I transform, I believe  
I feel the light lifting me

Just breathe  
Just breathe  
Just breathe
