

# Parallel Universe

Nova Twins

What's the big deal?  
It's not like you're innocent  
What's the big deal?  
Don't judge me, judge yourself  
I'm a big girl  
Stop being so critical  
You loath all the things  
You hide within yourself

What the fuck are you talking about?  
Hear the words coming out of your mouth  
Talk is cheap, yea you better pay it out  
Yeah, you better pray now

And we're living in a parallel universe  
Looking back at ourselves, like we are all absurd  
Love me, hate me, SOS, save me  
People wishing you well, or wishing you were dead  
Everybody's a god, on the Internet  
Love me, adore me, build me up, destroy me

I'm a phoenix rising from  
Fire, can you hear alarms?  
Faster, stronger than before  
Superhuman stamina  
Better sit back down  
Do you think you can stand up?  
Better sit back down  
It's about to get messed up

What the fuck are you talking about?  
Hear the words coming out of your mouth  
Talk is cheap, yeah, you better pay it out  
Yeah, you better pray now

And we're living in a parallel universe  
Looking back at ourselves, like we are all absurd  
Love me, hate me, SOS, save me  
People wishing you well, or wishing you were dead  
Everybody's a god, on the Internet  
Love me, adore me, build me up, destroy me

I'm 'a cut through under pressure  
Can't catch me I'm a sprinter  
Another bites the dust, ain't it bitter?  
Talk is cheap, better place a wager  
I'm 'a cut through like a ninja  
Stone cold look, Medusa  
Looking at me, fucking hater  
Try and spit it out, shh, rage

Ah

Yea we shatter, yea we shatter like glass animals  
Yea we shatter, yea we shatter like glass animals  
Yea we shatter, yea we shatter like glass animals  
Yea we shatter, yea we shatter like glass animals

And we're living in a parallel universe  
Looking back at ourselves, like we are all absurd  
Love me, hate me, SOS, save me  
People wishing you well, or wishing you were dead  
Everybody's a god, on the Internet  
Love me, adore me, build me up, destroy me  
Love me, hate me, SOS save me
