

I'm bored, it's getting harder to ignore
Petulance, I've found a cure
Give 'em, give 'em some, psych my delirium
Hypnagogic illusions
Tips on my tongue, licking ice cubes 'til you're numb
Make you shiver like a thriller
Hands on my neck, got me choking in a sweat
Science under our flesh, it's an experiment

Tell, tell me, what you going to do about it?
Ain't saying much but I always hear them talking loudly
So out of touch, electric eels run through our bodies
Feel every wave, wave, wave
Tell me, what you going to do about it?
Ain't saying much but I always hear them talking loudly
So out of touch, electric eels run through our bodies
Feel every wave, wave, wave

It tastes a lot like licorice, they all want what I am giving
How I love to see them fall
Taking it all in, see it spilling from their lips
Drawling like a dirty dog
Swallow it or spit, put some fucking shine on it
No, don't mind me all
Listen at my door with their ears pinned on the wall
Curious, they want to know, they want to know

Tell me, what you going to do about it?
Ain't saying much but I always hear them talking loudly
So out of touch, electric eels run through our bodies
Feel every wave, wave, wave
Tell me, what you going to do about it?
Ain't saying much but I always hear them talking loudly
So out of touch, electric eels run through our bodies
Feel every wave, wave, wave

Every, every, every, every, every wave
Every, every, every, every, every wave

Who's that knocking on my door?
Kn-kn-knocking on my door
They always knocking on my door
Kn-kn-kn-kn-knocking on my door

Tell me, what you going to do about it?
Ain't saying much but I always hear them talking loudly
So out of touch, electric eels run through our bodies
Feel every wave, wave, wave
Tell me, what you going to do about it?
Ain't saying much but I always hear them talking loudly
So out of touch, electric eels run through our bodies
Feel every wave, wave, wave

Who's that knocking on my door?
Kn-kn-knocking on my door
They always knocking on my door
Kn-kn-kn-kn-knocking on my door
