

# Close Your Eyes

Novaspace

Close your eyes,  
close your eyes tonight,  
close your eyes,  
close your eyes.

Love me in the starlight,  
take me on the moon tonight,  
show me, what you feels like,  
can we'll be flying all night.

Up in the sky,  
flying so high,  
for be on the moon,  
floring in time.  
Silver so bright,  
Mercury light,  
Galaxy of love,  
my baby and I.

Don't let me go,  
hold me, you know,  
all I need is you,  
the way, that's you blow.  
Crystal and ice,  
midnight sunrise,  
baby can't you see,  
just close your eyes.

Close your eyes,  
close your eyes tonight,  
close your eyes,  
close your eyes.

Love me in the starlight,  
take me on the moon tonight,  
show me, what you feels like,  
can we'll be flying all night.  
Love me in the starlight,  
take me to the moon tonight,  
show me, what you feels like,  
can we'll be flying all night.

Like years away,  
stars on display,  
a hallo in the night,  
around Milkey way.  
Love is devine,  
come, baby, shine,  
the univers is ours,  
devotion is sign.

Hold me tonight,  
been a senside,  
energy and vibe,  
planets colide.  
Together we rise,  
Infinite skies,

baby can't you see,  
just close your eyes.

Close your eyes,  
close your eyes tonight.

Love me in the starlight,  
take me on the moon tonight,  
show me, what you feels like,  
can we'll be flying all night.  
Love me in the starlight,  
take me on the moon tonight,  
show me, what you feels like,  
can we'll be flying all night.

Close your eyes, close your eyes tonight,  
Close your eyes...
