

Find It

November 2nd

As blind people follow the light
To reach the warmth that is so far and distant
I try to go, I try to find the way that leads to
A place to hide from this world
Sometimes I see in my memory
Gleams of secret place I must have been to
Only peace and feeling of being complete
I wish to take you with (me)

No matter how far I gotta go
I will find it
No matter how hard I gotta try
I will find it
If only we could see the sun
After all what is to do is done
I'm free

In the day she seems to do the same things
As other people do
But at night she changes her skin
Runs away to fields to dream of future
She's read a thousand books on queer things
Now she thinks that she can see direction
Like everyone who uses heart, eyes and ears
to live his life
She's seeking

No matter how far I gotta go
I will find it
No matter how hard I gotta try
I will find it
If only we could see the sun
After all what is to do is done
I'm free
But shadow of a doubt is in every soul
