

Okay, okay
Can we save this talk for another day?
I can't seem to get out of my way
Take a pill, doctor said it goes away
But I won't change
Little bitch, I'm [?]
New truck with the digital display
I deserve it 'cause I started my own wave
They try to copy me but they can't emulate
Stop tryna play, yeah

And I'm in the backwoods
Observing the patterns in the trees
But you're in a nightclub
Trying to run from everything
And I always felt like I needed feeling anywhere
I thought I buried your body
But I still see you every night

Okay, okay
Can we save this talk for another day?
I can't seem to get out of my way
Take a pill, doctor said it goes away
But I won't change
Little bitch, I'm [?]
New truck with the digital display
I deserve it 'cause I started my own wave
They try to copy me but they can't emulate
Stop tryna play, yeah

The cult of the reaper saved me
The cult of the reaper demands my eternal sacrifice
