

PSYCHO_PSYCHIATRY

nothing,nowhere.

Every day is another affliction
Got another heartbreak and another prescription
And I'm sick and tired of the love and deception
Need a full night sleep or a lethal injection

What up
You wanna fuck with us?
You wanna fuck with me?
What up
When it comes to pain I got a PHD

Dark thoughts that I can't ever get past
A little optimism that I never can make last
Try to be strong but the hurt grows stronger
And it's been too much I can't take much longer

Wasting away
I suffocate
(I get stuck in the in-between
Overthink everything's never what it seems)
New day, new pain
(Waist deep in anxiety
This is psycho psychiatry)

I taste their pharmaceuticals
I start to plan a funeral
You'll look so pretty when you're dead
I take the gun put it to my
Head, head
I take the gun put it to my
