

# Shiver

nothing,nowhere.

Fake plastic palm trees and cellophane  
Concrete and billboards east LA  
My point of view might disappear  
I always feel so small out here

We used to make out in my truck  
Said you were in love but not enough  
One day you said it's over  
Took off to California

Why'd you have to run away  
Be someone that you're not  
Now every time I hear your name  
My stomach drops

I'm on the other side of the river river  
And you're out of town getting high  
Watch me shiver shiver

Dirt roads and drug deals  
And tweakers  
Heartbreak you feel through the speakers  
I'm on the other side  
Watch me shiver shiver

I fell asleep by the riverbed  
Woke up thought I smelled your cigarettes  
Walked home barefoot passed the park  
Where you and I fell apart

Why'd you have to run away  
Be someone that you're not  
Now every time I hear your name  
My stomach drops

I'm on the other side of the river river  
And you're out of town getting high  
Watch me shiver shiver

Dirt roads and drug deals  
And tweakers  
Heartbreak you feel through the speakers  
I'm on the other side  
Watch me shiver shiver

Why'd you have to run away  
Be someone that you're not  
Now every time I hear your name  
My stomach drops

I'm on the other side of the river river  
And you're out of town getting high  
Watch me shiver shiver

Dirt roads and drug deals  
And tweakers  
Heartbreak you feel through the speakers

I'm on the other side  
Watch me shiver shiver

Dirt roads and drug deals  
And tweakers  
Heartbreak you feel through the speakers  
I'm on the other side  
Watch me shiver shiver
