oh baby I'm not over you

Woo... still loving you

No, what are these tears that I don't know the meaning of?  
I try to brush it off but they keep falling yeah  
When I'm going to meet you for the first time in a while oh  
You may be over me but I'm not over you  
How can I forget you that easily? it's still really hard  
Even if a long time passed  
The reality was just the same  
We used to be one  
I want you back

We're still the same  
Your smile that looks at me is the same  
I guess my heart only knows you  
Look how it's racing at the sight of you  
It feels like my breath will stop  
My tears are rising and it hurts  
More than any lie in this world  
Saying that I completely forgot you is the worst

I can't get over you  
Girl just come back to me  
You're the only one

Step back  
You can't approach me yet  
I used to hate you because I was sad yeah  
I need to erase all the bad memories oh

I'm sorry, I couldn't feel this when I was with you  
But I'm so lonely - hundreds and thousands of times  
At the end of each day, I think of you all night  
You revolve inside my head and I get lost in it alone  
Wanna make it right, back to the way beginning  
It probably can't be as I say  
I need you with me, definitely  
I'll never let you go

We're still the same  
Your smile that looks at me is the same  
I guess my heart only knows you  
Look how it's racing at the sight of you  
It feels like my breath will stop  
My tears are rising and it hurts  
More than any lie in this world  
Saying that I completely forgot you is the worst

I can't let you go like this  
I can't say goodbye for a second time  
I will find love, I earnestly wanted only you

We had the same love  
We live in the same memories  
I guess my heart only loves you  
Look how it's racing at the sight of you

Come back to me my girl  
You and I are one till the end  
I'll find the love that I saved till the end for yo  
Come back to me again oh baby I'm not over you

Woo... still loving you
