

## Perfect Circle

Nujabes

Three hundred and sixty five days in a daze  
Spent up in a screen of purple haziness  
My affair with this lady named laziness  
Laissez-faire mon frère, au revoir les enfants  
And... on and on it goes like a marathon  
On and on it goes till the break of dawn of a new era  
Who better to usher in the age of extras, et cetera, et cetera?

The one and only almighty and holy  
Omnipresent and potent to show thee  
The jubilee of free will at work for food for thought  
Who would have could have should have said and done this and that  
After the fact and fiction blended like a broken dictionary  
Are we supposed to carry on all alone  
By any means necessary, act tough when it's scary?  
Fair enough, the moon has a dark side  
The sun shines like there's not another day to waste in haste  
A hotsec since the last time it got kinda cold to the bone  
O Mi Deo Gloria, when the mind expands the body finds a temple  
Inner area in which to flip the scripture  
Dip the pen and picture in my heart, a scene apart  
It's a perfect circle  
It's a perfect circle

Three hundred and sixty degrees in a breeze  
Sitting on top of the world it sure feels  
Like a million souls are trying to eat  
Off a plate worth a buck and nobody gives a nut yeah  
Round and round it goes like a Merry-go and  
Round and round it goes like a Ferris wheel and  
Everybody knows that this earth is round but  
Most of us still live like the world is flat

Clap, clap your hands to this beat  
Celebrate word, life, and friends soon to be  
All city, all state, then come across home plate  
Talk about life mission on the journey to make  
Hate and love, shove and hug, mate and fun, fate and luck  
Break and bake the bread and cheese and let the day pass by  
Fade into the past like an old calendar page  
Chilling like barrels, taste finer with age  
All the blessings on this planet disappear when taken for granted  
You see the writing on the granite, understand it?  
Follow though the steps till we meet before we're obsolete  
Even it it's oblique to me, it's a perfect circle  
It's a perfect circle  
It's a perfect circle
