

**It**

**Number One Gun**

Out of my way, you can't stop me  
You don't see it, you don't see it  
Running around cause I'm stronger  
You can't move me, you can't move me  
I look at you and laugh at your face  
Cause I've beat you, and I've beat you  
Spinning the world all over again  
I'm against you, I'm against you

You know it's typical  
The way you make that face  
You're always typical  
Have nothing left to say

Everything all around  
Take a look at something new  
Every second I'm around  
I decide to live for you  
And you can start a fire in my heart  
You can show me who you are  
Cause that's what I want  
Every second I'm around

Out of my way cause I'm faster  
And I know it cause I'm smarter  
Thought you should know that I'm done with you  
Done with you, done  
Living it up cause my heart beats  
With love beats, with love now

I would take my life back  
Take it all back, all back

You know it's typical  
The way you make that face  
You're always typical  
Have nothing left to say

Everything all around  
Take a look at something new  
Every second I'm around  
I decide to live for you  
And you can start a fire in my heart  
You can show me who you are  
Cause that's what I want  
Every second I'm around

And with every breathe that I take  
I will show you I believe  
Coming faster than an airplane  
I feel your love come over me  
Yeah

Everything all around  
Take a look at something new  
Every second I'm around  
I decide to live for you

And you can start a fire in my heart  
You can show me who you are  
Cause that's what I want  
Every second I'm around  
Every second I'm around
