

## Divine Love

NVDES

Go rest your mind, let it starve inside  
I'll meet you where our time collides  
Go take a step to the other side  
I'll be there

Dazed and confused let me share that love  
You've got the key to your universe  
Body to art and soul to skin  
I'll be there

Be my divine love, be my divine love

We've got the colors right in ourselves  
You don't need fear or doubt yourself  
Building those castles right in our heads  
I'll be there

Walk in a million frequencies  
Come take a step and dive with me  
Body to art and soul to skin  
I'll be there

I'll switch the light on  
I'll switch the light on  
I'll switch the light on  
I'll switch the light on  
I'll switch the light on  
I'll switch the light on  
The light on

Be my divine love, be my divine love

Let love in  
Let love in  
Let love in  
Let love in

Be my divine love, be my divine love

Let love in  
Let love in  
Let love in  
Let love in

Let love in  
Let love in  
Let love in
