

# Reach Up

O.A.R.

Way back when we used to plan and pretend  
Feel like we were dreaming every day back then  
And running down light on beautiful days  
Till the fireflies start movin' through space

I could see in all of us could be some magic  
On the street lights we imagined  
That all our world is all I want  
Let it go and get it, bring it home

So everyone reach up, put your hands together  
Don't give up, climb forever  
All you've got, just remember  
You make me feel like I'm a contender  
Two hands up through the ceiling  
The beat of my heart is all that I'm feeling  
Giving all that I've got, first to the last one  
And then I reach up cause I'm a champion

Hands are waving, stadium shaking  
I've already made up my mind  
Time is awaiting, I'm reaching for greatness  
I'm running till I break through the line

So everyone reach up, put your hands together  
Don't give up, climb forever  
All you've got, just remember  
You make me feel like I'm a contender  
Two hands up through the ceiling  
The beat of my heart is all that I'm feeling  
Giving all that I've got, first to the last one  
And then I reach up cause I'm a champion

Reach up, reach up, reach up  
Two hands up (put your hands together), two hands up, two hands up  
Cause I'm a champion  
Reach up (put your hands together)  
I got my two hands up  
Reach up, I got my two hands up  
You make me feel like, make me feel like I could reach up

So everyone reach up, put your hands together  
Don't give up, climb forever  
All you've got, just remember  
You make me feel like I'm a contender  
Two hands up through the ceiling  
The beat of my heart is all that I'm feeling  
Giving all that I've got, first to the last one  
And then I reach up cause I'm a champion

Reach up (put your hands together)  
I got my two hands up  
Reach up, I got my two hands up  
You make me feel like, make me feel like I could reach up  
Reach up  
I got my two hands up  
Reach up, I got my two hands up

You make me feel like, make me feel like I could reach up
