

# Whatever Happened

O.A.R.

Tell me I'm dreaming  
My feet are stone and my light is dim  
Chasing this demon on his way down

Whatever happened? Whatever happened?

Spent the night out on the hill  
And watched the world  
Sleep sound and still  
And over mountains  
Darkness will wash me over

Whatever happened? Whatever happened?  
It's been a long way back  
From the edge of that  
Saw the world from the hill  
I'm right back where it started  
And it still feels right  
Like the very first time  
I saw the world like a kid  
Yesterday is over  
Let's write another story tonight

City gates of rusted iron  
Can't contain the light inside  
So I spot this devil at the county line  
And went no further

Whatever happened? Whatever happened?  
It's been a long way back  
From the edge of that  
Saw the world from the hill  
I'm right back where it started  
And it still feels right  
Like the very first time  
I saw the world like a kid  
Yesterday is over  
Let's write another story tonight

After all the time is gone  
I'll have morning

It's been a long way back  
From the edge of that  
When the world was a kid  
I'm right back where it started  
And it still feels right  
Like the very first night  
Saw the world like a kid  
Let's write another story tonight  
I saw the world from the hill  
Let's write another story tonight  
I saw the world like a kid  
Let's write another story  
Write another story tonight
