

# Smoke Signals

Obey the Brave

Tension's in the air  
See all the smoke signals  
Let's go  
5 AM, staring at the ceiling  
Going from bad to worse and I'm feeling  
All my mistakes, my failures  
The weight of the world I created is crushing me lately  
Don't follow me, don't follow me  
It's always the same  
Lost in the days and the night's getting darker  
I'm getting farther away  
Let it fill my lungs  
Give me something I can hold on to  
Let it fill my lungs  
So I can let go  
So breathe it in  
Exhale my sins  
Numb the pain  
I'm trying to find my way out with smoke signals  
My way out with smoke signals  
My way out with smoke signals  
(Tension's in the air  
See all the smoke signals)  
Burning the midnight oil  
Deadlines and expectations have spoiled my love for the game  
The pressure is rising, my thoughts are colliding  
Spiraling out of control  
Nothing to break my fall  
I'm spiraling out of control  
Nothing to break my fall  
Can't eat, can't sleep  
Fuck it, the fuse is lit  
Finger's on the self-destruct button  
Stir up the ashes  
Then light another candle  
Escape the darkness  
Finally let the dust settle  
Let it fill my lungs  
Give me something I can hold on to  
Let it fill my lungs  
So I can let go  
So breathe it in  
Exhale my sins  
Numb the pain  
I'm trying to find my way out with smoke signals  
(Just let it go, just let it go)  
My way out with smoke signals  
(Just let it go, just let it go)  
My way out with smoke signals (Smoke signals)
