

# Double Vision

Ocean Alley

As I took a look around the room  
I thought I saw you dancing through the blue lights  
You could feel it in the air  
You could feel the way it buzzed around my feet

Am I shifting to a different world  
My course is bending light years in the wrong way  
I was heading for the glare  
I was trying just to break out of my ways

Now I feel, how I feel it's alright  
Now I feel, how I feel it's alright  
It's alright, it just feels like

Double vision  
Two of the same now you're spinning  
Double vision  
Don't lose your mind you're on a mission

Should've waited till the sun went down  
So my eyes they don't get blinded by the same light  
And it's never really fair  
And it's never really normal what I feel

I was nearly there  
I could see my vision twisting, moving in the right way  
Then I showed it to myself  
A double vision of my dream

Now I feel, how I feel it's alright  
Now I feel, how I feel it's alright  
It's alright, if it feels like it

Double vision  
Two of the same now you're spinning  
Double vision  
Don't lose your mind you're on a mission

Double vision  
Two of the same now you're spinning  
Double vision  
Don't lose your mind you're on a mission

Now I feel, how I feel it's alright  
Now I feel, how I feel it's alright  
It's alright, it just feels like

Double vision  
Two of the same now you're spinning  
Double vision  
Don't lose your mind you're on a mission

Double vision  
Two of the same now you're spinning  
Double vision
