

Well it took some time
To get it right
To recognize
The infinity in the sky
At the speed of light
I've got peace of mind
With the echo chambers
And melodies in my mind

And it feels alright
Slowly drifting over you
And I feel alive
Alive

Guess you were right
Things are really looking up from here
We start to fly
Higher into the atmosphere

Well we took our time
Never broke the line
In the distance
There's a million traps designed
To make you trip and fall
Up against the wall
With the red lights flashing
And the cameras watch it all

And it feels alright
Slowly drifting over you
And I feel alive
Alive

Guess you were right
Things are really looking up from here
We start to fly
Higher into the atmosphere

Guess you were right
Took some time to get up here
At least we tried
To blast off into the atmosphere
