

CALI SUN

Ocean Grove

I wanna bleach my head
I wanna break some teeth
So just stop
I'm too high

City of angel dust
Is looking picturesque
So just stop
I'm still high

A pill of painless
To liberate you
My head is up with the stars
My brain, I'm ready to blow

So entertain us
Go-getter status
She's got a promise to keep
So I will find my way to you

I've been feeling sick in
The California sun
I've been kinda sad in
The California love

With all the shakes and cliques
It's all the money and things
They can't stop
I'm still high

Without the drugs and hits
And all the 40's and drip
They all stop
I'm still high

Forever shameless
Persuading greatness
And you're on top of the world
Screaming "fuck the world"

City of angels
Ready to claim us
She's got a promise to keep
So I will find my way to you

I've been feeling sick in
The California sun
I've been kinda sad in
The California love
Didn't mean to break your heart
At least you got one left
I've been kinda sad in
The California love
California love
California love
California sun

Take me to the future
As I ride a one-way plane
She'll be waiting for me
Back in Californ-I-A

I've been feeling sick in
The California sun
I've been kinda sad in
The California love
Didn't mean to break your heart
At least you got one left
I've been kinda sad in
The California love
California love
California love
California sun
