

Be all too sure with precaution
While the weather's right you have to stay inside
No I won't play up with you
Oh I remember 9:30 craft & glue
Now I measure sanity by the piss in a bottle
Was it nice to meet you?

Be much too rough, like I know you can
Be much too rough, so I know you care

All I ever wanted was to be like a country whore, trade the thr
ee showers, controllers and late car calls
I'm all too excess for you

I only know my highs, I've only known my highs
I only know my highs, I've only known my highs

Be much too rough, like I know you can
Be much too rough, so I know you care

I said it's me all three all three while dying
It's me all three all three while dying
I said it's me all three all three while dying
It's me all three all three while dying

Be much too rough, like I know you can
Be much too rough, so I know you care

It's me all three while dying
I said it's me all three all three while dying
It's me all three while dying
