

Berry Bush

Ocie Elliott

Well, we want this kind of living
And we know where we will go
Where the berry bush is giving
And the time is slow and oh
All the stars are glowing in it
And an owl is howling low
Whispering through night's vivid
There's a feeling calm and old

Waking up at five, we're driven
Out into the morning light
Deep into the woods we'll live in
We will hike until we're high
Balling out below the mountain
We will look up at the sky
From a river water fountain
We will drink up when we're dry

Back down, we'll try to know this living
Back down, we'll try to find our home
Back down, we'll try not to give in
To all we know that does us harm

On a back dirt road we're going
Traveling a mellow mile
Down the hills on wheels we're rolling
Wearing our big happy smiles
There's a black bear somewhere hidden
And a wild cat in the hills
To the lake we'll ride then get in
Filling up with little thrills

Back down, we'll try to know this living
Back down, we'll try to find our home
Back down, we'll try not to give in
To all we know that does us harm
Back down, we'll try to know this living
Back down, we'll try to find our home
Back down, we'll try not to give in
To all we know that does us harm
