Lights Out

Odette

Taking five
You left your lights on
May I swear
You go from them to her

Quick step, try to get ahead
Could you say the same thing
That you said to me about
Your regrets?
Take it back
And give it time to mend

Take me time to realise
Your head is cold, your heart is ice
I'm not on way out
I'm just here for right now
How did I not realise?
I was just needing your advice
I'm working my way up
At least I found out on the way down
On the way down, on the way down
Down, on the way down, on the way down

You left
Your number on the wall
You left
To test my self control

But I can bite back
No tears falling from my eyes
I got out at the right time
I said what I meant
And now he's gone

Take me time to realise
Your head is cold, your heart is ice
I'm not on way out
I'm just here for right now
How did I not realise?
I was just needing your advice
I'm working my way up
At least I found out on the way down
On the way down, on the way down
Down, on the way down, on the way down

Take me time to realise
Your head is cold, your heart is ice
I'm not on way out
I'm just here for right now
How did I not realise?
I was just needing your advice
I'm working my way up
At least I found out on the way down
On the way down, on the way down
Down, on the way down, on the way down

Down, on the way down, on the way down

Down, on the way down, on the way down
