

You Should Be With Me

Ofenbach

I've been in the sunshine where you should be
Come play me like a guitar that never weeps
If you wanna sing that sweet melody
You should be with me
You should be with me

Cause I try to get you off my mind
But you're all I need
Don't be shy, you should be with me
You should be with me

I've been in the sunshine where you should be
Come play me like a guitar that never weeps
If you wanna sing that sweet melody
You should be with me
You should be with me
You should be with me
You should be with me

Let's get no sleep
Dive into deep, fly into the dark
It ain't easy, need you with me
Before I fall apart

Cause I try to get you off my mind
But you're all I need
Don't be shy, you should be with me
You should be with me

I've been in the sunshine where you should be
Come play me like a guitar that never weeps
If you wanna sing that sweet melody
You should be with me
You should be with me
(One, two)

I've been in the sunshine I never leave
Come play me like a guitar that never weeps
If you wanna sing that sweet melody
You should be with me
You should be with me

Cause I try to get you off my mind
But you're all I need
Don't be shy, you should be with me
You should be with me
You should be with me
