

Let It All

Off With Their Heads

I'm unimpressed and I'm not ashamed
I made the change and I've come to a place today
I am all my own
I walked down a path that was overgrown
But I cleared it out and carried away
All of the things that I wanted to keep me safe
I put the rest on hold
It's all just noise, it all got old

Run away and never look back
Let it fade in, let it all go black

I'm not stressed and I'm not phased
I took control of the hell that's taken space
Inside for far too long
Pulling my strings and singing my songs
Keeping me sick, keeping me drained
Taking away any good that's there for me
And I missed somehow
We're living in a world that will crumble and fall

Run away and never look back
Don't be afraid, it's not an attack
Run away and never look back
Let it fade in, let it all go black

I'm not stressed and I'm not phased
I took control of the hell that's taken space
Inside for far too long
Pulling my strings and singing my songs

Run away and never look back
Don't be afraid, it's not an attack
Run away and never look back
Let it fade in, let it all
Run away and never look back
Don't be afraid, it's not an attack
Run away and never look back
Let it all in, let it all
Let it all, let it all go black
