

Chill

Light on my side as my ego becomes  
A funky child with some words on my tongue  
Be like intake of breath and my mouth gets loose  
So while I scatter my spit, I dream of juice  
Have you ever made out in dark hallways?  
Displayed a kiss that made the day?  
Or, say, play a track from your record collection  
It's your mix, congratulations

We changed a lot and then some, some  
Know that we have always been down, down  
If I ever didn't thank you, you  
Then just let me do it now

I bet you light up when we start the show  
Follow me now, very closely 'cause I told you so  
You know we glow because we throw sun rays  
Now we be freaky and we want to stay

We changed a lot and then some, some  
Know that we have always been down, down  
If I ever didn't thank you, you  
Then just let me do it now

Keep my feet on the ground  
Keep my head in the clouds  
Electrified by the sound  
It comes from the down, and

Lightning strikes, yo we be in that violent force of light  
Guaranteed to turn it out as bad as Dolemite  
Because we're dope, kid, change like the chameleon  
And the channel, whatever the whack show the "Real World" is on  
You know we dazzle like ghetto box boomin' battles  
Rattle inside your head, feel redeemed like Cola bottles  
Fall in love with your teachers, on the wax we are self made  
Check the technique, always in L.A.
