

Heart Hope

Oh Wonder

They're building towers that are high enough to see the clouds
But it don't bother me
The elevators working overtime up and down
Yet it don't bother me

Cause I need something more than everything
A higher self deep within
Cause I need something more than everything
A higher self, a higher self

And I know we need a little heart hope
I know we've gotta outgrow and feel a little heart hope

They're building aeroplanes faster than the speed of light
Yet it don't bother me
The endless cities multiplying out oceansize
Yet it don't bother me

Cause I need something more than everything

A higher self deep within
Cause I need something more than everything
A higher self, a higher self

And I know we need a little heart hope
I know we've gotta outgrow and feel a little heart hope
Cause there is something more than everything
So feel the love and let it in
Cause I know we need a little heart hope

And I know we need a little heart hope
I know we've gotta outgrow and feel a little heart hope
Cause there is something more than everything
So feel the love and let it in
Cause I know we need a little heart hope
