

What's within us

Ohm Square

Hot shots pick clothes from shop windows
What they desire
Their bodies thrive on special care
Consumption is the Savoir Faire
Born in a wealthy bubble
Those eyes
Hot wired, flying high

We got lost in the glow of precious things our successes
Mirror image
We got lost in the glow of the things we've been blessed with
And it takes one to know how to glow from what's within us
then we will surely do right, we'll be doing right

One day we wont have money but a chip under our skin
And then you will value me for the skin I am wrapped in

And wouldn't you look funny with a skip under your chin
And a lavish pair of shades to hide the dollar signs in
Those eyes. Hot wired, flyin high

Don't forget about your roots (look around)
What d'you think that you are here for? (strip it down)
Before the big space cat comes to take you away
Strip it down (strip it down)
Stand sturdy in your boots (look around)
Who do you think they were made for? (Strip it down)
Before the big space cat comes to take you away
Strip it down (strip it down)

We got lost in the glow of precious things our successes
We got lost in the glow of the things we've been blessed with
We got lost in the glow of precious things our successes
And it takes one to know how to glow from what's within us
