

Magic

Old 97's

The fools out in the forum
They fandango and they fight
And I'm tryin' to ignore 'em
But they keep me up all night
These cigarettes are lazy
They're killin' me so slow
If you're here to save me well you'd better hurry up
Because I'm spinning out of control

I believe you when you say
There's magic in the air
There's magic in the air
Love will figure out a way
To drive away despair
There's magic

A new year's day is dawnin'
A chance to start again
There's folks I should be callin'
My failures and my friends
But god I feel so lonely
In my soul I'm so alone
If you're here to show me something hurry up and do it quick
'Cause here's a trick I'm turning to stone

I believe you when you say
There's magic in the air
There's magic in the air
Love will figure out a way
To drive away despair
There's magic

Why would you lie about something so true
I wouldn't do that to you
I wouldn't do that to you
I don't know how you made yourself disappear
Now I'm looking for you
I'll keep on looking for you

I believe you when you say
There's magic in the air
There's magic in the air
I believe you when you say
There's magic in the air
There's magic in the air
I believe you when you say
There's magic in the air
There's magic
