

# The One

Old 97's

I got a check for nothing  
All made out to someone  
I truly love myself  
Murry says we're going to take the money sometime  
Well it might as well be this time  
We're going to spend it all on ourselves

Ken, pick this bank at random  
I said do we shoot them  
and he said either way's alright  
Whistling boy that's Philip, he's our drummer  
He does the theme from endless summer  
You know he's waiting out in our ride

Throw the money in the van  
It all worked out just like we planned  
Now the good times have begun, that's not a fire it's just the sun  
It's like the old man said, take the money and run  
What's the rush  
Let's take the one  
Let's take the one

Love, it gets passed around so freely  
Their so touchy and so feely  
I'm hanging onto my  
I like you California  
Although I feel obliged to warn ya  
We're going to rock you blind

What's the point of cutting tracks  
With all this money in the back  
Now the good times have begun, that's not a fire it's just the sun  
The old man said take the money and run  
What's the rush  
Let's take the one  
Let's take the one  
Let's take the one  
Let's take the one

I, let's take the one  
I, let's take the one  
Oh, let's take the one
