

# How It Works

Old Sea Brigade

Will you wait in the cab  
Or will you drive away  
Put my faith in the moment  
While I watch everything change  
'Cause it's not fair  
They're not your debts to pay  
Sometimes I get nervous  
And I don't know what to say

You only know it's leaving when it goes  
That's how it works  
That's just how it works  
If it's coming back nobody knows  
That's how it works  
That's just how it works  
There'll be no sleeping until it goes  
That's how it works  
That's just how it works  
And how to fight the feeling nobody knows

You know it's really coming down  
When you can smell the exhaust  
Still worry your laughter  
Is a little bit forced  
I'm learning to let go  
I'm building a life  
Now I can look at the scars  
And not think of the knife

You only know it's leaving when it goes  
That's how it works  
That's just how it works  
If it's coming back nobody knows  
That's how it works  
That's just how it works  
There'll be no sleeping until it goes  
That's how it works  
That's just how it works  
And how to fight the feeling nobody knows

You only know it's leaving when it goes  
That's how it works  
That's just how it works  
If it's coming back nobody knows  
That's how it works  
That's just how it works  
There'll be no sleeping until it goes  
That's how it works  
That's just how it works  
And how to fight the feeling nobody knows
