

Will We Ever Learn?

Oleta Adams

We could take a train, be miles away by morning
And forget about those things we're supposed to do
'Cause we can't afford to wait an other moment
We made the world just wait for me and you
Everywhere people try to building castles in the sky
Try to climb so high
You and I sometimes were blinded by the light
If we'd only used our eyes

Will we ever learn, love's the only reason why we all be living
It's the only gift worth giving
And the world will turn every time another lover takes that vow
We will make it somehow. Will we ever learn?
Will we ever learn?
Will we ever learn?

And the people on the street are always rushing
So afraid they might lose something on their way
I don't care if we never make a million
We just got to find another way to live
Dance with me, moving to the rhythm
Can you feel be free what else do we need
Close the door nothing really matters while we live

Will we ever learn, love's the only reason why we all be living
It's the only gift worth giving
And the world will turn every time another lover takes that vow
We will make it somehow
Will we ever learn?
Will we ever learn?
All that love is certain is certain

Will we ever learn?
Love's the only reason why we all be living
It's the only gift worth giving
And the world will turn every time another lover takes that vow
We will make it somehow

Will we ever learn?
Love's the only reason...
It's the only gift worth giving
And the world will turn every time another lover takes that vow
'Cause we only got now
Will we ever learn?
Will we ever learn?
