

Do You Feel Me?

Oliver Tree

Everybody knows that I'm sticking it out
Everybody hates that I'm feeling myself
Something made me think about it
Something made me think about

That's when it hit me
I'm not existing here
Nobody's listening
But I can hear you clear
That's when it hit me
I'm not existing here
Nothing came out when I opened my mouth to you

Something made me think about it
Something made me think about it
I needed more
Something made me think about
What I'm coming for

Come on
Come on
Do you feel me at all
Do you feel me at all

That's when it hit me
I'm not existing here
Nobody's listening
But I can hear you clear
That's when it hit me
I'm not existing here
Nothing came out when I opened my mouth to you

Do you feel me?
'Cause I'm feeling myself
Why don't you feel me?
When will you feel me though?
So you don't feel me?
'Cause I'm feeling myself
Why don't you feel me?
When will you feel me though?

Something made me think about it
Everybody knows that I'm sticking it out
Everybody hates that I'm feeling myself
Something made me think about it
Something made me think about

That's when it hit me
I'm not existing here
Nobody's listening
But I can hear you clear
That's when it hit me
I'm not existing here
Nothing came out when I opened my mouth to you

Do you feel me?
'Cause I'm feeling myself

Why don't you feel me?
When will you feel me though?
So you don't feel me?
'Cause I'm feeling myself
Why don't you feel me?
When will you feel me though?
