

# Star

Oliver Tree

When I watch you from a distance  
You really start to glisten  
When I see you are approaching  
All I know is baby you're a star  
So keep on going, you made it this far  
You shine bright and you show it  
Baby you're a star

And no one can stop you  
The world is yours  
So do what you want to  
You will find that if you try  
No mountain is too hard to climb

When I watch you from a distance  
You really start to glisten  
When I see you are approaching  
All I know is baby you're a star  
So keep on going, you made it this far  
You shine bright and you show it  
Baby you're a star

And you should know that too  
If you're flying away  
Then go where you have to, that's okay  
Fill the hole in your soul  
Baby you're remarkable

When I watch you from a distance  
You really start to glisten  
When I see you are approaching  
All I know is baby you're a star  
So keep on going, baby you're a star  
You shine bright and you show it  
You made it this far  
So keep on going, please don't try so hard  
You're perfect as you are  
Baby you're a star
