

The First Night

Oliver Tree

It don't get any better
From what I felt that night
The first time that I met her
I felt something inside

So here we go now
Slow down
I can't escape these feelings
I'm spinning around
Slow down
There's not a better feeling

The first night we didn't kiss
We held hands like little kids
My life hasn't been the same since
Something not that second clicked

Every minute that we're together
I feel more high then ever
The only drug I need
Is when she's smiling at me

It don't get any better
From what I felt that night
The first time that I met her
I felt something inside

So here we go now
Slow down
I can't escape these feelings
I'm spinning around
Slow down
There's not a better feeling
That I found
My heart is what she's stealing
Let it out
There's not a better feeling

Without her I fell loss
She got me screaming from the roof top
I ain't right when she's gone
Even a minute feels too long
Every second that we're together
I feel more high then ever
The only oxygen I breathe
Is when she's standing next to me

It don't get any better
From what I felt that night
The first time that I met her
I felt something inside

So here we go now
Slow down
I can't escape these feelings
I'm spinning around
Slow down

There's not a better feeling
That I found
My heart is what she's stealing
Let it out, here's not a better feeling
