

Thin Air

Olivia Holt

People keep stopping me
People they noticed that something is different
Everything's different 'bout me
I was just minding my business
When I saw the light, something is different
Everything's different this time

Don't stop
Taking over all of my time
Make it all yours
Keep on
'Cause my heart likes the rush
So please give me more
More, more, more

Boy, this is crazy 'cause it came out of thin air
It must be magic what you doing it ain't fair
You got that perfect timing, baby, and I swear
Our chemistry is glowing, made the whole world stare

Boy, you came out of thin air, thin air, thin air
Like you've always been there, been there, been there
Before you I didn't care, didn't care, didn't care
Came out of thin air, you came out of thin air

I wanna go with your love
I won't have to give you up
Pull me in closer,
Not scared to admit I want your touch
Your voice is a symphony,
Singing sweet melodies
Pull me in closer
'Cause when I rolled over, you got me

Don't stop
Taking all of my time
Make it all yours
Keep on,
'Cause my heart likes the rush
So, please give me more
More, more, more

Boy, this is crazy 'cause it came out of thin air
It must be magic what you doing, it ain't fair
You got that perfect timing, baby, and I swear
Our chemistry is glowing, made the whole world stare

Boy, you came out of thin air, thin air, thin air
Like you've always been there, been there, been there
Before you I didn't care, didn't care, didn't care
Came out of thin air, you came out of thin air

[Jordan Fisher:]
Like you checking on me
Yeah, I've been watching, too
It's like you're just a diva, but, baby,
It's because of you

You never knew I felt this too
But now we're here with nowhere left to hide
The way you're looking at me, it's how I look at you
Don't need space in between, just cut the tension right through
Real soon, we can fly to like thin air to check the view, yeah

Boy, this is crazy 'cause it came out of thin air
It must be magic what you doing, it ain't fair
You got that perfect timing, baby, and I swear
Our chemistry is glowing, made the whole world stare

Boy, you came out of thin air, thin air, thin air
Like you've always been there, been there, been there
Before you I didn't care, didn't care, didn't care
Came out of thin air, you came out of thin air
